

SMART Board™ 600i interactive whiteboard system

Time is everything

For successful business people, time is money. Every minute spent setting up for a meeting is a minute lost for collaborating. Save time and energy with the SMART Board™ 600i interactive whiteboard system. Incorporating a Unifi™ 35 projector, a SMART Board interactive whiteboard and speakers, the 600i is the ideal solution for any meeting room because it eliminates the need to purchase, install and manage separate hardware components.

Ready for action

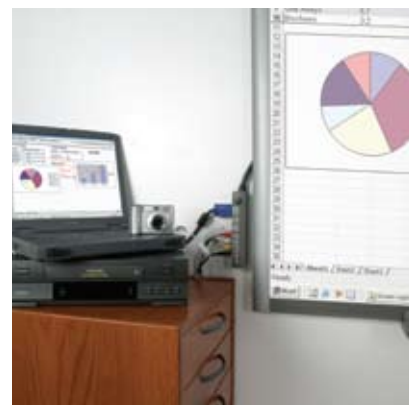

Using the 600i requires little training, and start-up time is quick. Just walk up to the system, hit one button and start working. The 600i is the perfect system for mass meeting-room installation because it is so easy to use. The simple functionality of the ScratchPad whiteboarding application allows you to write notes and save them as PDF or JPEG files to a USB key, without having to use a computer or network system.

Powerful presentations

Increase your use of audiovisual devices like VCRs, DVD players, digital cameras and laptops simply by plugging them into the extended connection panel. Now you can write over video and digital photos, and capture them for future use. The 600i has the interactive touch features and high quality that customers associate with all SMART products, making it an invaluable tool for training sessions, ad hoc meetings or client presentations.

One system fits all

The 600i's space-saving design is effective in meeting rooms of all sizes. It can be implemented into virtually any collaboration environment because the projector is located directly above the interactive whiteboard, so there's no need for complicated wiring or ceiling mounting. The system is easy to purchase and install and needs minimal support and maintenance. The 600i's integrated components ensure that you focus on collaboration – not technology.

Integrate your existing audiovisual equipment into your presentations. Plug your digital cameras, DVD players, VCRs and laptops into the extended connection panel, and create enticing training sessions and ad hoc meetings.

Dimensions

Active screen size

Model **area (diagonal)**

SB660i 64" (162.6 cm)

SB680i 77" (195.6 cm)

Features

- 1 Unifi projector
- 2 Audio system
- 3 Touch-sensitive surface
- 4 Extended connection panel
- 5 Control module
- 6 Eraser and pens

Key features

- **SMART Board interactive whiteboard** – The touch-sensitive display connects to your computer and Unifi projector to show your computer image. You can then control computer applications directly from the display, write notes in digital ink and save your work to share later. The SMART Board interactive whiteboard comes with feature-rich SMART Board software.
- **Unifi projector** – An integrated XGA (1024 x 768) projector featuring Vikuiti™ super close projection technology. A locking mount secures it in place.
- **Audio system** – Two, 20-watt, stereo-amplified speakers are controlled from the pen tray.
- **Control module** – Launch the Unifi projector On-Screen Interface, and control projector power and volume from the pen tray.
- **Unifi On-Screen Interface** – Select projector sources, adjust projector settings and access help screens, all from the SMART Board interactive whiteboard.
- **Extended connection panel** – Easily connect a computer, VCR, document camera, DVD player or other peripherals.
- **Write over any source** – Pick up a pen and write over any source, including video, and capture to a USB storage device.
- **Warranty** – Two-year warranty on Unifi projector, 90-day or 500-hour warranty on lamp. SMART Board interactive whiteboard warranty is five years upon product registration, two years standard.
- **ScratchPad whiteboarding application** – Write notes and save them as JPG or PDF files to a USB key. There's no need for a computer.

SMART Board software

Ever wonder what makes SMART Board interactive whiteboards so powerful? Meet SMART Board software – the real genius behind the world's number one interactive whiteboard.

Notebook™ software

- Create, manage and save materials into a single, presentation-ready file. Export files to clients and colleagues. Integrate digital content, such as Adobe® Flash® files and audio and visual components into presentations. Arrange pages using the Page Sorter. Use Dual Page Display to view two pages simultaneously. You can draw, take notes and attach files or link to objects and websites on either page.

Ink Aware

- Use a pen from the pen tray or a Pen button to write directly into Ink Aware applications, such as Microsoft Excel®, PowerPoint® slides, Word files and AutoCAD® and save notes directly into these files.

SMART Board Tools

- Type with the On-Screen Keyboard, make a video file with the SMART Recorder, write over video with the SMART Video Player, and focus and prioritize concepts with the Screen Shade and Spotlight.

LinQ™ software

- Connect quickly between devices using a wired or wireless network. Use a laptop to project onto and control applications on the interactive whiteboard (and vice versa).

Software system requirements

- Supports Windows®, Mac OS and Linux® operating systems
