

# The Saville Group Ltd

## WEEE Policy

The Saville Group Ltd recognises its obligations under the EU Directive on Waste Electrical and Electronic Equipment (WEEE) and shall meet these obligations as follows:

### **Producer Obligation**

As an importer, reseller, re-brander and distributor of EEE, The Saville Group Ltd has undertaken an assessment of their product range and the impact of the producer responsibilities upon the organisation.

In line with the EA and DTi guidance, The Saville Group Ltd are obligated for the following WEEE:

- anything branded or re-branded with the 'Saville' logo
- historic WEEE where replacement product is sold by The Saville Group Ltd on a like for like basis

All other equipment sold by The Saville Group Ltd either has first UK legal title vested with another producer or the obligation has not been passed on by the manufacturer to The Saville Group Ltd. Producer responsibility under WEEE therefore remains vested with them and not The Saville Group Ltd. In such cases, they should be approached directly to discuss WEEE takeback.

In order to meet its own obligations, The Saville Group Ltd has registered with the Valpak compliance scheme.

Our WEEE Producer ID is: WEE/EE0044SY

### **Charges for Historic WEEE**

Normally, charges for historic WEEE shall not apply however:

- It may very well be the case that EEE supplied to replace historic WEEE will be of much larger size, for example, an LCD projector could be sold to replace a large CRT projector. The function would be seen as a like for like replacement but the cost implications for the processing of the CRT would far outweigh that of the newer unit.

In such cases, there may be a charge for the disposal of such historic WEEE. Any such circumstances must be notified to The Saville Group Ltd sales representative in order that any additional recycling/disposal costs can be met and included on the final sales invoice.

- Where The Saville Group Ltd have no prior knowledge of historic WEEE and/or once the sale is complete, The Saville Group Ltd reserve the right to charge for the removal and disposal of such WEEE.

### **Shipping & Transport**

Wherever possible, WEEE and historic WEEE shall be removed by our installations teams whilst on site.

Should this not be practical or possible, other collection or shipping services can be arranged. The Saville Group Ltd reserves the right to charge for these services.
